## POTATOES ARE A PROFITABLE CROP

WILL BRING BIGGER RETURNS THAN ANY OTHER SUBURBAN FARM PRODUCT GROWN.

Washington, D. C. April 12.—Irish potatoes are one of the easiest and most profitable suburban crops. They may be grown on almost any type of soil which possesses sufficient moisture and plant food, though they thrive best on sandy loam or gravel loam soils, and it is on these types that maximum crops of high quality potatoes can be produced.

If the land which is to be planted to potatoes is not likely to wash in the winter, plow in the fall to a depth from 9 to 10 inches if the character of the land will permit. Deep plowing insures a greater water-holding capacity. Spare no pains in fitting the land for planting. Thorough preparation is essential to large yields, advises the Department of Agriculture.

Should a poor sod land be selected for a potato bed, apply from 1,000 to 1,500 pounds of a fertilizer analyzing from 2 to 3 per cent off ammonia, 6 to 7 per cent off phosphoric acid and 7 to 8 per cent of potash. If a stubble or corn land is used increase the ammonia contents to 3.12 or 4 per cent. Half the ammonia should be derived from dried blood, tankage, or other organic forms and the other half from nitrate of soda or ammonium sulphate.

Select a variety of seed potatoes which is known to do well in the locality. Some good varieties of the potato are Irish Cobbler, Early Ohio, Rose Four, for early potatoes and Green Mountain and Peerless for late growth. The importance of good seed can not be too strongly emphasized. In fact first place, the seed should be free from varietal mixture and disease, and true to name and type. The tubers should be reasonably smooth and firm, with the first sprouts just starting in growth. Wilting or badly germinated seed is not desirable.

Plant these potatoes from 3 to 6 inches in depth depending on the nature of the soil. Plant shallow on heavy clay soils and deep and on light sandy or muck soils. Plant in rows from 30 to 36 inches and from 10 to 14 inches apart depending on variety growth and the fertility of the soil. Early varieties can be planted closer than late ones. Cover seed with at least 3 inches of soil. If planted as outlined 15 to 20 bushels of seed potatoes per acre will be required.

Give first tillage before plants push through the ground. The aim should be to keep the surface of the soil loose and free from weeds. Continue cultivations at frequent intervals remembering to go shallow each time, and gradually narrowing the space tilled. Potato plants are generally sprayed to protect them against leaf-eating insects pests or fungus pests. Protection against these insects is usually secured by some form of arsenical poison such as the arsenate of lead, or paris green. The potato plant may be protected against fungus diseases by keeping its foliage covered with Bordeaux mixture.

### EGGS IMPORTED.

From United States to Canada Last Year Amounted to 2,500,000 Dozen.

Edmonton, Alta., April 12.—While poultry growers in Edmonton have shipped a few cars of fresh eggs to Montreal, Toronto and other eastern markets, it must not be understood that the industry is overdone in Alberta. A. W. Foley, superintendent of the provincial poultry farm at South Edmonton, reports that fully 2,500,000 dozen of eggs were imported from the United States alone last year. "This," he said, "indicates

# DRINK HABIT

RELIABLE HOME TREATMENT.

The ORRINE treatment for the Drink Habit can be used with absolute confidence. It destroys all desire for whiskey, beer or other alcoholic stimulants. Thousands have successfully used it and have been restored to lives of sobriety and usefulness. Can be given secretly. Costs only \$1.00 per box. If you fail to get results from ORRINE after a trial, your money will be refunded. Ask for free booklet telling all about ORRINE. Sorrells Drug Co.

There is yet a long way to go before our growers can even think of an export trade. The production in Alberta in 1913 was 14,027,700 dozen of eggs, valued at \$3,031,086, and 667,964 fowl, estimated at \$449,856. The provincial government has installed incubators with a total capacity of 3,600 eggs at the southside farm, where one day-old chicks are sold to growers at actual cost. There are 700 pure bred birds at the station. Several hundred will be added this year. Egg circles are being organized in various communities.

### Look to Your Plumbing.

You know what happens in a house in which the plumbing is in poor condition—everybody in the house is liable to contract typhoid or some other fever. The digestive organs perform the same functions in the human body as the plumbing does for the house, and they should be kept in first class condition all the time. If you have any trouble with your digestion take Chamberlain's Tablets and you are certain to get quick relief. For sale by all dealers.

### EARNED A HOMESTEAD.

While Awaiting Admission to Canada by the Immigration Authorities.

Edmonton, Alta., April 12.—Nicholoff, a former subject of Russia, who passed five days and many nights at the entrance of the Dominion land office of Edmonton, earned property valued at \$8,300 by his lonely vigil. He was the successful applicant for a homestead near Athabasca, 96 miles north of here. The Athabasca river passes through the holding, leaving 27.7 acres for actual use. This is valued at \$300 an acre. Before leaving here for his new home Nicholoff said that he will begin work at once to carry out his homestead duties. There were two other applicants for the land, but they withdrew when they learned that Nicholoff was prepared to remain a month. The homestead was cancelled some time ago in consequence of the original filer not complying with the regulations. He was given 30 days in which to again occupy the land, but he took no heed of this and the land was again thrown open to settlement, with result noted.

## ARKANSAS FOLKS TELL ABOUT NEW MIRACLES OF HEALTH OF TODAY

Stomach Sufferers Restored by Just a Few Doses of Wonderful Treatment.

A lot of Arkansas people are needlessly suffering from stomach ailments. A lot of others have found a way to health and deliverance from the derangements of the digestive tract, which seem to be particularly prevalent in the South, by the use of Mayr's Wonderful Stomach Remedy. There is no better proof of what this truly remarkable remedy will do than what it has done. Here are the words of two Arkansas people: WILLIAM A. HARMAN, DeWitt, Ark., writes: "I took your full treatment and was greatly benefited by it. The amount of impurities removed from my system was simply wonderful."

CHARLIE SPENCER, Monticello, Ark., writes: "I received your wonderful stomach remedy and did not take it right away because I thought the dose was too large. But I felt so bad that I made up my mind to take it, and it has worked like a charm

and has helped me so much, my stomach feels like a new one." These people know, because they took it and proved it. That is one of the fine things about Mayr's Wonderful Stomach Remedy. The first dose proves what it will do. Mayr's Wonderful Stomach Remedy clears the digestive tract of mucus, acid secretions and removes poisonous matter. It gives quick relief to sufferers from ailments of the stomach, liver and bowels. Many say it has saved them from dangerous operations; many are sure it has saved their lives. Because of the success of this remedy, there are many imitators, so be cautious. Be sure it's Mayr's. Probably it is known among your own neighbors. Ask them. Go to R. G. Morris Drug Co.'s drug store and ask about the wonderful results it has been accomplishing among people they know—or send to Geo. H. Mayr, Mfg. Chemist, 154-156 Whiting St., Chicago, Ill., for free book on stomach ailments and many grateful letters from people who have been restored. Any druggist can tell you its wonderful effects.

# Arlington Hotel and Baths
